

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA
SAN FRANCISCO DIVISION**

NEXORA ROBOTICS, INC., a Delaware corporation,

Plaintiff,

v.

MERIDIAN DYNAMICS, LLC, a California limited liability company; and DOES 1–10, inclusive,

Defendants.

Case No. 3:26-cv-01847-PMA

COMPLAINT FOR:

- (1) Misappropriation of Trade Secrets
- (2) Breach of Contract
- (3) Tortious Interference

DEMAND FOR JURY TRIAL

Plaintiff Nexora Robotics, Inc. (“Nexora” or “Plaintiff”), by and through its undersigned counsel, brings this action against Defendant Meridian Dynamics, LLC (“Meridian” or “Defendant”), and alleges as follows:

I. NATURE OF THE ACTION

1. This is an action for the willful and malicious misappropriation of Nexora’s trade secrets relating to its proprietary autonomous warehouse-navigation stack, known internally as “Project Lodestar.” Between January and February 2026, three senior Nexora engineers resigned and immediately joined Meridian, taking with them confidential source code, sensor-fusion calibration data, and customer pricing models in violation of their written confidentiality and non-solicitation agreements.

2. Within nine weeks of those departures, Meridian announced a competing navigation product—“MeridianPath”—that replicated Nexora’s distinctive obstacle-prediction architecture in a manner that could not have been independently developed in that timeframe. Plaintiff seeks injunctive relief, compensatory damages of not less than \$18,500,000, exemplary damages, and attorneys’ fees.

II. PARTIES

3. Plaintiff Nexora Robotics, Inc. is a corporation organized under the laws of the State of Delaware, with its principal place of business at 2200 Bayfront Parkway, Palo Alto, California. Nexora designs autonomous material-handling robots for large-scale distribution centers.

4. Defendant Meridian Dynamics, LLC is a limited liability company organized under the laws of the State of California, with its principal place of business at 815 Harbor Way, Oakland, California. Meridian is a direct competitor of Nexora in the warehouse-robotics market.

III. JURISDICTION AND VENUE

5. This Court has subject-matter jurisdiction under 28 U.S.C. § 1331 and 18 U.S.C. § 1836(c) because Plaintiff asserts claims under the federal Defend Trade Secrets Act. The Court has supplemental jurisdiction over the related state-law claims under 28 U.S.C. § 1367.

6. Venue is proper in the Northern District of California under 28 U.S.C. § 1391(b) because a substantial part of the events giving rise to these claims occurred in this District and Defendant resides in

this District. This action has been assigned to the Honorable Patricia M. Alvarez, United States District Judge.

IV. FACTUAL BACKGROUND

7. Nexora invested more than four years and approximately \$42 million developing Project Lodestar, a real-time navigation stack that fuses LiDAR, stereo-vision, and inertial data to route fleets of autonomous robots through dynamic warehouse environments.

8. Nexora protects Lodestar through role-based access controls, encrypted repositories, mandatory confidentiality agreements, and a “clean-desk” policy. Fewer than fifteen employees had full access to the Lodestar source repository.

9. Defendants Aaron Whitfield, Priya Ramaswamy, and Devon Clarke (the “Departing Engineers”) each executed Nexora’s Proprietary Information and Inventions Agreement, which prohibits disclosure of confidential information and solicitation of Nexora employees for twelve months following separation.

10. Forensic analysis of Nexora’s systems revealed that, in the seventy-two hours before their resignations, the Departing Engineers collectively downloaded 6,214 files from the Lodestar repository to personal USB devices, including the complete sensor-fusion calibration dataset and the obstacle-prediction model weights.

11. On March 2, 2026, Meridian publicly demonstrated MeridianPath at the North American Logistics Expo. Independent benchmarking showed a path-planning latency profile statistically indistinguishable from Lodestar’s, a result Nexora contends is only explicable by the use of its misappropriated trade secrets.

V. FIRST CLAIM FOR RELIEF

(Misappropriation of Trade Secrets — 18 U.S.C. § 1836)

12. Plaintiff realleges and incorporates each preceding paragraph. The Lodestar source code, calibration data, and pricing models constitute trade secrets that derive independent economic value from not being generally known. Defendant acquired and used those trade secrets by improper means, causing Nexora damages in an amount not less than \$18,500,000.

VI. SECOND CLAIM FOR RELIEF

(Breach of Contract)

13. The Departing Engineers breached their written agreements with Nexora, and Meridian induced and benefited from those breaches. Nexora has been damaged as a direct and proximate result.

VII. PRAYER FOR RELIEF

WHEREFORE, Plaintiff respectfully requests that the Court: (a) enter a preliminary and permanent injunction restraining Defendant’s use of Nexora’s trade secrets; (b) award compensatory damages of not less than \$18,500,000; (c) award exemplary damages and reasonable attorneys’ fees; and (d) grant such other relief as the Court deems just and proper.

Dated: March 12, 2026

Respectfully submitted,

HARWELL, VOSS & REYES LLP
